756	Synthetic biodegradable temporizing tri-layered, 2mm thick open cell foam matrix made from biodegradable polyurethane. No animal proteins or polymer crosslinking. Inert in the presence of infection. Not a food source for bacteria. Converts macro wounds into organized micro wounds and promotes regeneration of neo dermis and neo vascularization. USFDA, EC, and DCGI approved. Patented and proprietary technology. Intended to be used to manage – traumatic, deep partial thickness burns and other chronic wounds, chronic venous ulcers, surgical reconstructive wounds. Easy to apply with sutures or staples.	5*5 cm		
757	Synthetic biodegradable temporizing tri-layered, 2mm thick open cell foam matrix made from biodegradable polyurethane. No animal proteins or polymer crosslinking. Inert in the presence of infection. Not a food source for bacteria. Converts macro wounds into organized micro wounds and promotes regeneration of neo dermis and neo vascularization. USFDA, EC, and DCGI approved. Patented and proprietary technology. Intended to be used to manage – traumatic, deep partial thickness burns and other chronic wounds, chronic venous ulcers, surgical reconstructive wounds. Easy to apply with sutures or staples.	6*8 cm		
758	Synthetic biodegradable temporizing tri-layered, 2mm thick open cell foam matrix made from biodegradable polyurethane. No animal proteins or polymer crosslinking. Inert in the presence of infection. Not a food source for bacteria. Converts macro wounds into organized micro wounds and promotes regeneration of neo dermis and neo vascularization. USFDA, EC, and DCGI approved. Patented and proprietary technology. Intended to be used to manage – traumatic, deep partial thickness burns and other chronic wounds, chronic venous ulcers, surgical reconstructive wounds. USFDA, EC, and DCGI approved. Patented and proprietary technology. Intended to be used to manage – traumatic, deep partial thickness burns and other chronic wounds, chronic venous ulcers, surgical reconstructive wounds. Easy to apply with sutures or staples.	10*20 cm		
760	Synthetic biodegradable temporizing tri-layered, 2mm thick open cell foam matrix made from biodegradable polyurethane. No animal proteins or polymer crosslinking. Inert in the presence of infection. Not a food source for bacteria. Converts macro wounds into organized micro wounds and promotes regeneration of neo dermis and neo vascularization. USFDA, EC, and DCGI approved. Patented and proprietary technology. Intended to be used to manage – traumatic, deep partial thickness burns and other chronic wounds, chronic venous ulcers, surgical reconstructive wounds. Easy to apply with sutures or staples.	20*40 cm		
761	Advanced Biodegradable Monolayered 2mm Thick foam Matrix designed to help body rebuild the lost Dermis safely and effectively. It is made of Medical graded Synthetic material (Polyurethane) and it does not contain animal products making it safe and reliable. Converts large wounds into organized healing zones and promotes regeneration of neo dermis and neo vascularization. USFDA, EC, and DCGI approved. Patented and proprietary technology. Inert to Fungus, Bacteria and Virus, does not promote Microbial growth, Intended to be used to manage – Traumatic, chronic wounds, chronic venous ulcers, surgical reconstructive wounds. Easy to apply with sutures or staples.	5*5 cm		
762	Advanced Biodegradable Monolayered 2mm Thick foam Matrix designed to help body rebuild the lost Dermis safely and effectively. It is made of Medical graded Synthetic material (Polyurethane) and it does not contain animal products making it safe and reliable. Converts large wounds into organized healing zones and promotes regeneration of neo dermis and neo vascularization. USFDA, EC, and DCGI approved. Patented and proprietary technology.
